APPROVAL OF STATE ENGINEER
subject to the terms and conditions imposed in said Permit 53013 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times. This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands. The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet. The total combined duty of water under Permits 53012 and 55307 shall not exceed 11.5 million gallons annually. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. This permit is issued under the provisions of NRS 534.120(2) as a preferred use.
The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to
exceed 1.0 cubic feet per second , but not to exceed 11.5 million
gallons annually.
